### 200 Educational Strategies To Teach

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's  $d$ ). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

As economic inequities in the United States endure and, in some instances, grow, and the large achievement gaps they help drive persist, calls for policy strategies to address these gaps increase as well. It is increasingly apparent that performance gaps take root in the earliest years of children's lives and do not vanish. It is thus critical that we assess the various aspects of early ...
