3d Printing With Reprap Cookbook

RepRap Cookbook is not, as the title might suggest, about building a RepRap styled printer. It is about using a repRap styped 3D printer. It starts with creating a 3D model using 123D Catch and then cleaning up, fixing, optimizing for 3D printing, and then printing a model using a variety of software. The range of software covered is impressive.

Until very recently, 3D printing companies sold only proprietary hardware and materials (including plastic filament) to print with them. This plastic was sold at exorbitant prices (up to hundreds of U.S. dollars per kg), even if it was a common material like ABS (the plastic used for Lego blocks). These companies were following the path of traditional desktop printing companies that rake in ...

At the end of the day, many of the components of 3D printers are conceptually (if not practically) the same as 3 axis milling machines and routers. In my next post in this series, 3D Printing 101: Part 2: Mechanics, I'll dig into the mechanical details on RepRap style (or more accurately Fused Deposition Modeling) printers.
