Amazon.com: Customer reviews: Achieving Excellence in ...

In the past, cataract surgery was not performed until the cataract had become well developed (ripe). Newer techniques, however, have made it safer and even more efficient to operate in earlier stages. Cataract surgery improves vision in up to 95% of people and prevents millions of people from going blind.

To achieve the best outcome after cataract surgery a thorough pre-operative office assessment is a requirement. This process starts with the patient. Driven by your unique visual needs and requirements we build a customized surgical treatment plan.
