Language Case Study: Language is the human capacity for acquiring and using complex systems of communication, and a language is any specific example of such a system. The scientific study of language is called linguistics. Any estimate of the precise number of languages in the world depends on a partly arbitrary distinction between languages and dialects.

In grammar, case changes what a noun, adjective or pronoun does in a sentence. It is a set of forms which depend on the syntax (how the words go together). Case is an example of inflection, which is often an affix, a part of a word that is added to other words, that signals a grammatical relationship. Long ago, Old English used several cases, but Modern English uses only two cases for nouns.
