From dust to the cosmos beyond, your civilization will rise through the ages under your guidance.

The Universim

Except in the lungfishes and the coelacanth, fins lack bones. In Actinopterygians, fins are supported by structures called rays. Some bony fishes have soft, flexible fin rays. Other bony fishes have spiny, rigid fin rays at the leading edges of the dorsal, anal, and pelvic fins. Both soft and spiny fin rays are modified scales.

The coelacanth — a giant weird fish still around from dinosaur times — can live for 100 years, a new study found. Females don't hit sexual maturity until their late 50s, the study said, while male coelacanths are sexually mature at 40 to 69 years. Coelacanths, which have been around for 400 million years, were thought extinct until they were found alive in 1938 off South Africa.
