Introduction. Understanding the concepts of diffusion and osmosis is critical for conceptualizing how substances move across cell membranes. Diffusion can occur across a semipermeable membrane; however diffusion also occurs where no barrier (or membrane) is present. A number of factors can affect the rate of diffusion, including temperature, molecular weight, concentration gradient, electrical ...

In Thomas Schwartz's lab, I use structural biology to investigate important cellular processes. This requires a lot of empirical trial and error, which I really like. Serving as a teaching assistant has allowed me to revisit fundamental biological concepts and see my own research from a different angle.
