Class (biology definition): a taxonomic rank (a taxon) consisting of organisms that share a common attribute; it is further divided into one or more orders. In the biological classification of organisms, a class is a major taxonomic rank below the phylum (or division) and above the order. For example, class Mammalia belongs to the phylum Chordata. Class Mammalia consists of various orders, such ...

The following is a list of putative words that have entries in two or more general English dictionaries, but that have two or fewer attested uses. Notable ghost words are also included for the sake of completeness.. Homonyms and individual senses of attested words are not included. This is due to the comparative difficulty of verifying non-attestability in such cases.
