Deaths End

Death's End (Chinese: 三体, pinyin: Sīshén yǒngshēng) is a science fiction novel by the Chinese writer Liu Cixin.It is the third novel in the trilogy titled Remembrance of Earth's Past, following the Hugo Award-winning novel The Three-Body Problem and its sequel, The Dark Forest.The original Chinese version was published in 2010. Ken Liu translated the English edition in 2016.

Death's End - Wikipedia

Death's End is an incredibly epic conclusion to the insanely imaginative and unpredictable hard science fiction trilogy, Remembrance of Earth's Past. I've read the first two books of this trilogy more than a year ago. The reason why I did not read Death's End till now was not because I didn't enjoy these books.

But that's still 100 times more massive than the 0.001 g/m² quoted by Death's End's "Russian expert." Is a 0.001 g/m² solar sail. plausible by "near future" standards? (This part of Death's End is set in Year 1 of the Crisis Era, i.e. "201X".) at least possible for a spacefaring civilization to achieve (in say the 24th century)?

How realistic is the 1 kg/km² solar sail in "Death's End"?

Death is the permanent, irreversible cessation of all biological functions that sustain a living organism. Brain death is sometimes used as a legal definition of death. The remains of a previously living organism normally begin to decompose shortly after death. Death is an inevitable, universal process that eventually occurs in all living organisms. Death is generally applied to whole ...
