A factory replacement belt costs about \$98 and a Continental timing belt price is about \$17. The total job cost would be around \$558 using OE parts and about \$477 using aftermarket parts. For a 2005 Dodge Neon with a 2.0-liter engine, the estimated labor time is around 2.7 hours.

### Timing Belt Replacement Cost Guide 2021 (Updated)

Timing belts are replaced as part of scheduled maintenance, usually every 60,000 to 100,000 miles. Timing belts can fail before that interval is reached, but most vehicles will never have a problem with this part. If a technician notices signs of premature wear during an earlier inspection, the timing belt should be replaced early.

### Honda Pilot Timing Belt Replacement Cost Estimate

Timing belts are replaced as part of scheduled maintenance, usually every 60,000 to 100,000 miles. Timing belts can fail before that interval is reached, but most vehicles will never have a problem with this part. If a technician notices signs of premature wear during an earlier inspection, the timing belt should be replaced early.

### Honda Accord Timing Belt Replacement Cost Estimate

The timing chain is located inside the engine which requires several steps to get to the timing drive, making timing chain and timing drive component inspection and replacement difficult. When replacing the timing chain, it's important that the accessory belt, tensioner, idler pulleys, and water pump are inspected as these components wear at ...

### Timing Chain System Frequently Asked Questions

History. The mechanical belt drive, using a pulley machine, was first mentioned in the text the Dictionary of Local Expressions by the Han Dynasty philosopher, poet, and politician Yang Xiong (53-18 BC) in 15 BC, used for a quilling machine that wound silk fibers on to bobbins for weavers' shuttles. The belt drive is an essential component of the invention of the spinning wheel.

### Belt (mechanical) - Wikipedia

A timing chain is a metal chain, as opposed to the timing belt which is made of rubber. The chain is located inside of the engine and needs to be lubricated by the oil in the engine so everything runs together. Every time you use the engine, the timing chain will be used. It connects the crankshaft to the camshaft.
