## Earthquakes Science Society 2nd Edition

A disaster area is a region or a locale that has been heavily damaged by either natural, technological or social hazards. Disaster areas affect the population living in the community by dramatic increase in expense, loss of energy, food and services; and finally increase the risk of disease for citizens.

Rayleigh waves are a type of surface acoustic wave that travel along the surface of solids. They can be produced in materials in many ways, such as by a localized impact or by piezo-electric transduction, and are frequently used in non-destructive testing for detecting defects. Rayleigh waves are part of the seismic waves that are produced on the Earth by earthquakes.

In contrast, most members of society view life on Earth from a religious perspective. The Age of Homo Sapiens Sapiens means the age of very wise human beings. The term Homo sapiens sapiens has its origins in science, and it means very wise human beings. According to the perspective of scientists (and historians), human history on Earth is ...
