Sometimes everything is connected to everything. In the simplest of times, we can treat the business environment as a given and focus on maximizing the efficiency of delivering a stable offering.

When Everything Is Connected to Everything Else

Perceptually speaking, everything "exists" along an improbable line of probability. On a long enough timeline of probability, what's possible and what's impossible begin to merge. Perceptually, everything is separate and finite. But actually, everything is connected and infinite.

Interdependent Universe: Everything Is Connected

As the subtitle of the book says Linked reveals "How Everything is Connected to Everything Else and What It Means for Business, Science, and Everyday Life". As Barabási writes in the Introduction, Linked "...has a simple aim: to get you to think networks. It is about how networks emerge, what they look like, and how they evolve.

"In nature we never see anything isolated, but everything in connection with something else which is before it, beside it, under it and over it." - Johann Wolfgang von Goethe "All things are connected like the blood that unites us. We do not weave the web of life, we are merely a strand in it. Whatever we do to the web, we do to ourselves."
