Students, Teachers, and Administrators - ThinkCentral

This standard refers to expressions. Expressions are a series of numbers and symbols (+, -, \times , \div) without an equals sign. Equations result when two expressions are set equal to each other ($2 + 3 = 4 + 1$). Example: • $4(5 + 3)$ is an expression. • When we compute $4(5 + 3)$ we are evaluating the expression. The expression equals 32.

Fifth Grade - Grade Level Overview - Georgia Standards

The key to learning math is repetition, and our math teachers go through multiple examples. Math teachers show students step-by-step directions on how to solve these more complex problems. Students learn money, ratios, decimals, graphing, and other concepts from the 6th grade curriculum.

Grade 6 - Practice with Math Games

A math expression is different from a math equation. An equation will always use an equivalent (=) operator between two math expressions. For example, $25 + 7 = 64 \div 2 = 20 \times 5 = 102$. The structure of defining math expression advances in different grades. In early grades, children are expected to write math expressions using numbers and ...
