Sustainability Report 2020 | WPP
Sustainability is the capacity to endure in a relatively ongoing way across various domains of life. In the 21st century, it refers generally to the capacity for Earth's biosphere and human civilization to co-exist. It is also defined as the process of people maintaining change in a homeostasis-balanced environment, in which the exploitation of resources, the direction of investments, the ...

The world's production industries have generated tremendous amounts of economic growth since the 1800s, but the industrialization of cities has also led to significant challenges such as overcrowding and extreme pollution. Because urban environments are often home to many industrial facilities, people come to the city seeking employment, but large metropolitan hubs are running
