Austin Maynard Architects Sustainable Residential Architecture

The urban concept for the extension envisaged the placement of a clear geometric volume on the northern edge of the square. The building form takes inspiration from the old cantonal school, built in 1842 to the north of the site, which defines the urban frame with its architectural clarity.

David Chipperfield Architects - Kunsthaus Zürich

Focusing on a single, clear volume, the proportions of the building have been carefully developed around a central courtyard to maximise the effectiveness of natural ventilation and daylight. Three large urban openings connect this central void with the exterior surroundings, providing views over the city and the mountains in the distance and ...

Tonight, 'Epic Iran' will feature on BBC2's 'Secrets of the Museum,' a behind the scenes look at the V&A - showing the work of its curators and conservators. The episode shows the extensive conservation works and installation of ten-meter-long replicas of the painted interiors of mosque domes from central Iran, dating from the 1850s and created by local Iranian craftsmen.

Gort Scott

Extremely durable multi-use coating. Although we've taken local and national VOC (volatile organic compound) regulations into consideration, such as the Ozone Transport Commission Specifications (OTC), because these regulations vary greatly around the U.S. and are subject to change, we suggest verifying that product selections meet the requirements of the area in which they are to be used.

Pro Industrial™ Water Based Catalyzed Epoxy - Sherwin-Williams

The survey determines the site configuration and area. The surveyor's measurements of the elevations of existing elements are particularly important for tying the proposed project into existing roads and utilities and, possibly, to existing buildings. Grades are indicated and related to a fixed point, often a datum established campus-wide.
