The Python Quick Syntax Reference

The Python Language Reference. ¶. This reference manual describes the syntax and “core semantics” of the language. It is terse, but attempts to be exact and complete. The semantics of non-essential built-in object types and of the built-in functions and modules are described in The Python Standard Library. For an informal introduction to the language, see The Python Tutorial.

The Python Language Reference — Python 3.9.0 documentation

The Python Quick Syntax Reference is the “go to” book that contains an easy to read and use guide to Python programming and development. This condensed code and syntax reference presents the Python language in a well-organized format designed to be used time and again.

Python Quick Reference Guide

Conditional Statements and Loops

Conditional Statements: if, elif and else

Use if, elif and else to define code to be executed if a specified condition is true:

```
if patientid == 42113: print "The patient ID is 42113" elif patientid == 42007:
```

```
print "The patient ID is 42007" else: print "The patient ID is some other number"
```
